EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Janik Marcovici on 2/2/04.

The application has been amended as follows:

IN THE CLAIMS:

Cancel the non-elected claim 6.

- 2. The following is an examiner's statement of reasons for allowance: The prior art does not teach a surface micromachining process, wherein a thermal oxide is grown to define a gap between a hinge pin and a subsequently deposited polysilicon cap and after defining a hinge cap/staple by etching the polysilicon followed by removing the grown oxide in order to rotate the pin inside the hinge cap/staple as the context of claim 1.
- 3. The closest prior art Zavracky et al (5,493,470) disclose a process of surface micromachining on a substrate including silicon-on-insulator (SOI), wherein an oxide is grown after defining openings on a silicon single crystal layer and a polysilicon clamp (270) is formed and etching is performed to etch the polysilicon and finally the oxide is etched to form a cavity (274), which cavity is sealed with an oxide (col.10, lines 33—col.11, lines 18).

Application/Control Number: 10/040,687

Art Unit: 1765

Zavracky et al fail to teach removing the grown oxide to rotate the pin inside the cap or staple as the context of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Daneman et al (2001/0055831) and Yun et al (5,759,870) disclose conventional micromachining process.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shamim Ahmed whose telephone number is (571) 272-1457. The examiner can normally be reached on M-Thu (7:00-5:30) Every Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine G Norton can be reached on (571) 272-1465. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
